A complete digital banking suite with mobile sensibilities

uniFI
DIGITAL BANKING

UniFI is the new leader in digital banking solutions. Built on the latest open-platform technologies, UniFI delivers a consistent and intuitive user interface across all channels. This framework allows financial institutions to provide consumers with a true omni-channel experience.

MEA Financial has long been a leader in premium mobile banking solutions. We're now pleased to offer UniFI, a complete online suite of digital banking tools that is second to none. Our mobile-centric solution is hosted within MEA's SSAE 18 compliant data centers.

The UniFI platform is full-featured and flexible, allowing you to customize the user experience to your preferences. No two financial institutions are the same, so we allow you to provide technology to consumers in a way that meets the unique needs of your specific market.

What makes UniFI different?

A complete solution. UniFI includes standard browser-based banking, device-specific mobile apps, SMS/Text Banking and Treasury Management. Consumers are able to choose the channel and features that are right for them.

Consistent across all channels. Consumers can move from one channel to another with ease thanks to UniFI's omni-channel design.

The latest technology. UniFI is a new, modern, scalable platform that will position your financial institution for success now and for the forseeable future.

Device-specific mobile apps. MEA Financial provides custom Android, iPhone and iPad apps to meet the needs of the widest range of users.

Text banking standard. UniFI consumers enjoy the convenience of text-based balance inquiries, transfers, etc., as well as text-based transaction alerts.

Third-party agnostic. MEA believes that every institution should be free to choose its own best of breed add-ons like bill pay, mobile deposit capture, e-statements, personal financial management, etc. We provide unmatched flexibility by interfacing to the vendors you choose.

Additionally, an online account opening module is also available.
